PRODUCT DEMO

MedSaathi

Understand your medical report in simple words.

An AI report explainer for patients. Photograph a scan or lab report, even a handwritten one, and get a clear explanation with colour-coded results.

01 THE PROBLEM

Why patients need MedSaathi

?

Medical jargon

Reports are full of terms like "echotexture" or "epididymal cyst". Patients leave the clinic confused.

~

Handwritten notes

Many reports and requisition slips are handwritten, so typed-report apps cannot read them at all.

Aa

Hard to follow

Dense numbers, units and reference ranges. Patients need clear wording, and many need it read aloud.

The result

Patients panic over normal results or delay care, while doctors only have minutes per visit to explain. Target users: patients and families, especially elderly and semi-urban users.

02 HOW IT WORKS

From a photo to a plain-language answer

1

Upload

Take a photo or upload the report, typed or handwritten.

2

Read

OCR extracts the text and cleans it up.

3

Explain

An AI model explains findings with safety rules.

4

Act

Colour-coded summary, doctor questions and audio.

Data stays encrypted. Users can delete their reports at any time.

03 REAL INPUT, CLEAR OUTPUT

From confusing numbers to clear answers

SAMPLE DIAGNOSTICS LAB

Pathology and Clinical Laboratory

Patient: Ravi K. Age / Sex: 45 / M

Date: 18-Oct-2026 Ref. by: Dr. A. Sharma

HAEMATOLOGY / BIOCHEMISTRY

TEST	RESULT	UNIT	REFERENCE
Hemoglobin	10.2 L	g/dL	13.0 - 17.0
Total WBC count	7,800	/cu.mm	4,000 - 11,000
Platelet count	2.4	lakh/cu.mm	1.5 - 4.1
LDL Cholesterol	165 H	mg/dL	< 100
Fasting Glucose	92	mg/dL	70 - 99

*** End of report ***

L = Low H = High

Sample report with fictional values.

MedSaathi

MedSaathi explanation

2 need attention

Hemoglobin 10.2 g/dL — Monitor

Slightly low. This can cause tiredness or weakness.

WBC count 7,800 — Normal

In the normal range. No action needed.

Platelets 2.4 lakh — Normal

In the normal range.

LDL cholesterol 165 mg/dL — See doctor

Higher than the usual target. Discuss diet and a repeat test.

Fasting glucose 92 mg/dL — Normal

In the normal range.

Ask your doctor

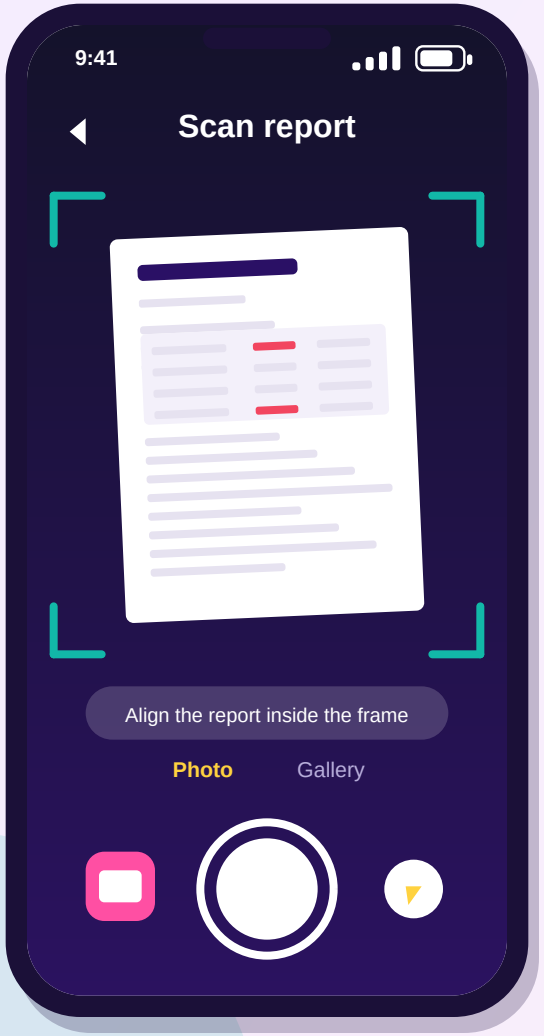
Do I need an iron test? Should the cholesterol test be repeated?

What the patient sees in MedSaathi

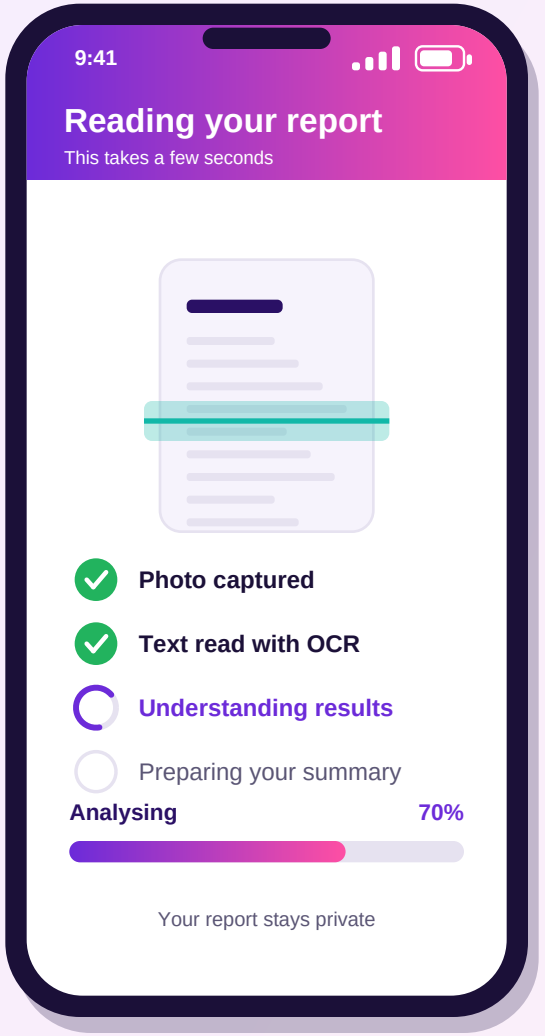
04 APP WALKTHROUGH

See it in action

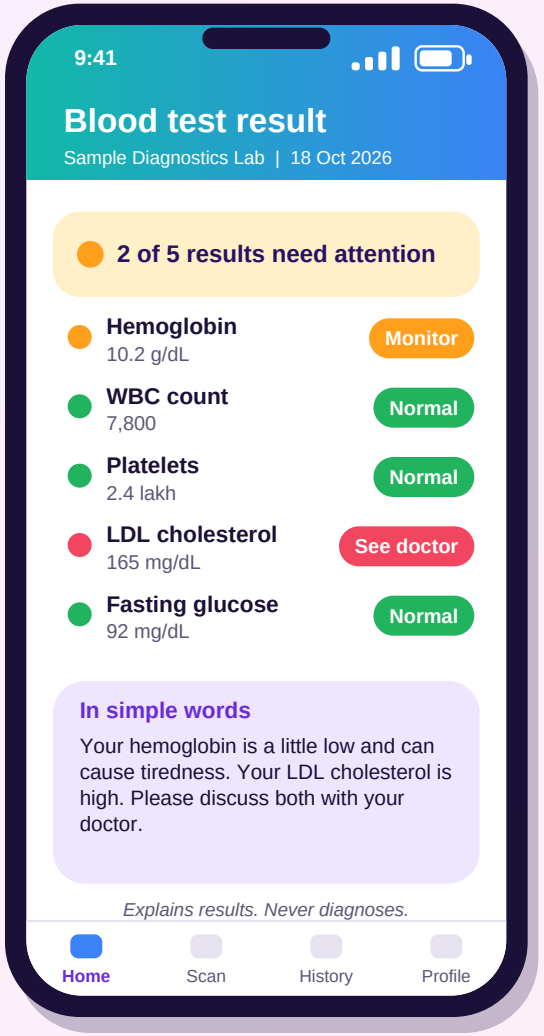
Sample screens, fictional data



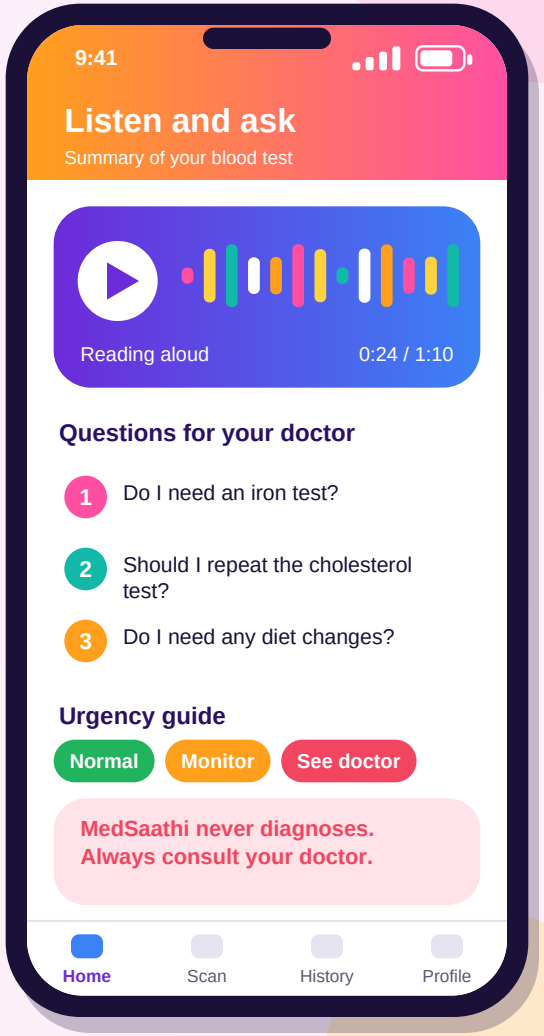
1 Scan



2 Read



3 Understand



4 Listen and ask

05 FEATURES AND SAFETY

Built to help, designed to be safe

Plain language

Medical terms explained in simple words.

Handwriting OCR

Reads handwritten reports and slips.

Urgency flags

Green, amber and red labels show what to act on.

Voice read-aloud

Listen to the summary. Ideal for elders.

Safe by design

- No diagnosis or prescriptions
- "Consult your doctor" on every result
- Encrypted storage of reports
- Delete reports at any time
- Honest about limits on messy handwriting
